

# KENMORE AIR™

Flying the Pacific Northwest Since 1946

## 1968 DeHavilland DHC-2 MKIII Project \$995,000

**Registration Number:** N70346  
**Serial Number:** 1689 TB57  
**Airframe:** 16,232.0 hours  
**Engine:** PT6A-34AG 0.0 TSOH by Dallas Airmotive

This aircraft is currently in dry storage at Kenmore Air Harbor where a complete airframe overhaul including fuel system, wiring, and flight controls, was completed.

Here is the link to the aircraft at dhc-2.com:

[www.dhc-2.com/id924.htm](http://www.dhc-2.com/id924.htm)

The fuselage is ready for your custom paint scheme, avionics package and upholstery choices. The aircraft includes a set of Wipline 6100 amphibious floats and wheel gear. There is also an extensive spares package for the airframe and floats.
